

The IFLA GREEN LIBRARY AWARD 2026

A Special Recognition goes to

The Library, Document Management
and Museology Services (sBIDM)
of the University of Aveiro (UA),
Portugal, Aveiro

for their Green Library Project

Submission Title:

“A Linha do Clima (The Climate Line):
Where Art and Science Inspire
Climate Engagement”

Submitted by Sandra Oliveira

The reviewers praised the project as an innovative, creative, and highly communicative example of climate literacy that successfully combines art with environmental education. They highlighted its originality, environmentally responsible design, and strong community engagement, noting that sustainability is embedded throughout the project and supported by green office practices and circular economy principles. The collaboration behind representing 30 years of climate change was considered particularly impressive. Reviewers appreciated the project's lasting value and potential to inspire future library initiatives.

This project was carried out with minimal resources but has a big impact. The Library, Document Management and Museology Services (sBIDM) of the University of Aveiro (UA) will receive, to further their project, €500 from the award sponsor De Gruyter Brill, the international publishing house.

IFLA/ENSULIB and De Gruyter Brill congratulate the winner!
